

STRUCTURAL DESIGNER

Allied Engineering has an exciting opportunity for a Structural Designer of building structural systems. We offer a fast-paced, team-oriented environment that promotes intellectual and creative growth. Working alongside a project discipline leader, the candidate will be expected to provide new ideas and share knowledge that will advance each project, the firm's mission, and their professional careers.

Qualifications:

- Associates Degree or other Revit course certification
- 0-4 years of experience
- Proficient in using Revit and AutoCAD software
- Experience preferred in other software including Bluebeam, Skype, and Microsoft Office programs (OneNote, Outlook, Word and Excel)
- AutoCAD and Bluebeam experience considered a plus

Responsibilities:

- Prepare Structural models and contract drawings using Revit and AutoCAD software
- Utilize Revit software to provide material quantities and other related tasks
- Work closely with the Project Structural Engineer and coordinate Structural work with other Engineering disciplines
- Ability to work as part of a project team using collaboration software and independently as required.

Essential Functions:

- Effective written and verbal communication skills
- Personal organization and time management skills
- Integrity and honesty in all dealing
- Able to build strong relationship with coworkers
- Excellent attention to detail

Allied Engineering rewards hard work and creativity with a competitive compensation package that includes:

- 100% Employee Owned (ESOP - Stock Ownership)
- Paid time off (vacation, sick, community service)
- Healthcare, dental and life insurance benefits
- 401(k) retirement savings plan with automatic company contribution
- Education assistance
- Flexible work environment

AA/EEO

Job Type: Full-time
